

For smaller orders, rush and more economical orders we create your logo and text into a Stencil Photographic Format. You can also have your logo in color with this method. We **do not** have the capacity in doing an engraving method locally. We can engrave, but this must be done directly at our factory overseas and it adds to the cost of shipping internationally versus domestically. It will also add to production costs.

This Photographic Stencil Method already have a black background and it blends very nicely to the black crystal base made for this purpose of all our available designs and it also will fit the base size very nicely. We designed it this way.

Below you can see such ideas on some of our designs, but it can be done to any of the designs we have in stock in Tampa.
